Aurion Monodose Medication System

1 Our latest concept to allow you safe and quick integration of medicine logistics and distribution, from pharmacy to patients. The core of the system is the Aurion Compact trolley which may be fitted with up to 3 MONODOSE CASSETTES (MC). Each MONODOSE CASSETTE (MC) may have from 6 to 15 patient BINS: your choice!

Aurion Compact Monodose Medication System is:

- SAFE as every patient BIN will be securely locked into the MONODOSE CASSETTE.
- QUICK as a single action LOCK will allow access to all patient BINS in any MONODOSE CASSETTE.

Here are few possible configurations:

Aurion Monodose Medikations-System

1 Unser neuestes Konzept für die sichere und zeitsparende Integration der Medikamentenlogistik und -verteilung, von der Apotheke bis zum Patienten. Im Mittelpunkt des Systems steht der Aurion Compact Multifunktionswagen, in dem bis zu 3 MONODOSE CASSETTEN (MC) untergebracht werden können. Jede MONODOSE CASSETTE (MC) ist wahlweise mit 6 bis 15 einzelnen PATIENTEN-BEHÄLTERN verfügbar. Das Aurion Compact Monodose Medikations-System ist:

- SICHER, weil jeder PATIENTEN-BEHÄLTER zuverlässig in der MONODOSE CASSETTE verriegelbar ist.
- ZEITSPAREND, weil ein VERSCHLUSS den Zugriff auf alle PATIENTEN-BEHÄLTER jeder MONODOSE CASSETTE erlaubt.

Hier einige der möglichen Konfigurationen:

1 **Système de distribution de médicaments intégré**
Notre nouveau concept va nous permettre d'intégrer la distribution des médicaments dans le chariot Aurion Compact en proposant un module pour la gestion des médicaments de 6 à 15 patients. Jusqu'à trois modules (MC) peuvent prendre place dans un chariot (chariots de 6 à 45 patients).
Voici quelques configurations:

1 **Sistema de medicación unidosis Aurion**
Nuestro último concepto nos permite ofrecer una integración rápida y segura entre la logística de los medicamentos y su distribución, desde la farmacia hasta el paciente. La base del sistema es el Carro Aurion Compact, que puede ser cargado hasta con tres CASSETTES UNIDOSIS (MC), cada uno de los cuales pueden tener de 6 a 15 cajetines individuales, a su elección.

System Advantages:

- LOCKING: Choose a Aurion Compact basic body with a KEY or a SEAL locking system.
- SINGLE LOCK: Aurion locking system will secure all drawers and MONODOSE CASSETTES into the trolley body and, at the same time, all patient BINS into the MONODOSE CASSETTES.
- FLEXIBILITY: The Aurion Compact basic body may fit virtually any combination of drawers, MONODOSE CASSETTES, Trays and baskets. Combinations may be modified by the end user at any time.
- UPGRADEABILITY: Select one of the recommended configurations in this catalogue, later add any accessories you may need. Please refer to Aurion Compact general catalogue.

Monodose Cassette (MC):

- USE: The MC acts as a normal drawer; it is easy to remove from the basic body.
- HANDLE: Each MC includes a handle to make transfer from storage to trolleys easiest.
- PATIENT BINS: They are provided with the MC; they have a label, 3 dividers and a clear plastic sliding top to make sure that medicines are not falling out of the bin.
- INDIVIDUAL MC LOCK: If the MC is into the trolley body, the trolley central locking guarantees the security. Once the MC is free standing, locking of the individual bins is provided by a SEAL.
- STACKING: The MCs are stackable to reduce space requirements in your storage / pharmacy.
